INDEX TO VOLUME IV

Ability to influence one's score on a questionnaire test of personality, 206-215.
Anthropology, cultural, 265 f.
Attitudes and connectionism, 247 ff.
Attitudes, biological or cultural in origin, 195-205: experiment, 196 ff.; cultural factor, 200 ff.; sex and regional differences in attitude, 201 f.

Balinese temper, 120-146.
Bernreuter personality inventory, 63 f.
Brain injuries, effect on handwriting, 83.

Character, description of, 46; old and young sciences of, 11-17; perseveration and, 44-52; relation of measurement of interest to, 147 f.
Clairvoyance, use of probable error in evaluating (critical comment), 79 f.; reply to above note, 80.
Concepts, constructive, 266; dynamic, 279; operational, 266, 279, 282; topological, 265; vector, 265.
Congresses, American Association for the Advancement of Science, 81; American Psychological Association, 174 ff.; British Association for the Advancement of Science, 170 ff.; Scandinavian psychiatric, 83 f., 257 f.
Connectionism, its treatment of wants, interests, attitudes, 245-253.
Correlation of persons instead of tests, 17-24.
Cultural atmosphere, 267; cultural factor in attitudes, 200 f.

Determining tendency, relation to character, 50 ff.
Deviants, among Balinese, 137.
Dynamics of the Gestalt psychology, 233-244, 319-334.

Education, article on comparative, 265-293; dependence on social structure of the group, 274 ff.
Emotional manifestations among the Balinese, 136 ff.
Expression and race, 52 ff.

Factor analysis, new development in, 294 f., 299 f.; psychological significance of, 340 f.; recent research on, 335-342; technique, description of, 17 f.
Factor, concept of personality, 13 f.
Faculties, historical criticism of, 12; test by statistical techniques, 13; fusion with theory of Gestalt, 15.
Faculties versus traits: Gall's solution, 216-231: Gall's psychology of character, 216 ff.; faculties and doctrine of attributes, 219 ff.; comparison of Reid's, Stewart's, and Gall's list of faculties, 222; relation of personality traits to faculties and factors, 225 f.
Factor theory in the field of personality, 35-43.
Fluency, factor of, 37 f.; comparison with speed factor, 39 f.

Germany, comparison of educational system with that of United States, 265-283.
Gestalt, conceptions applied to personality, 3.
Gestalt psychology, dynamics of, 233-244, 319-334; differences between Köhler and Koffka, 319, 323; historical considerations, 233 ff. Köhler's treatment: isomorphism, 236 f.; formation of segregated wholes, 236 ff.; directed attitudes, relation to conation and emotion, 240 ff. Koffka's treatment: attention and perception, 323 ff.; attitudes, 327; behavioral field, 321 ff.; things, forces in it, 321 f.; source of energies in it, 323; Ego, 320, 324 ff.; emotions, 327 ff.; executive, 331; summary of dynamic explanation, 331 ff.

Interest, measurement of, 147-169: relation to study of character, 147 f.; definition of interest, 149; children's interests, method of studying, 151 ff.
Isomorphism, 236 f.

Matching method, as applied to personality measurement, 6 ff.
Measurement of interest: 147-170.
Memory for faces and for names, 115-119; of normal and psychotic patients, compared, 29 ff.
Mental incapacity, a study of, 25-34: limitations of usual intelligence test in testing abnormal patients, 25; determination of amount of deterioration of intelligence in mental patients, 26 ff.; determination of original intelligence, 26 f.; comparison of memory ability in normal and abnormal, 29 ff.; its relation to intelligence, 30; interpretation of apparent deterioration of intelligence, 31 f.

Nursery school, comparison of German and American, 270.

Pacifism, and war, analysis of psychological attitudes toward, 305-318: psychological difficulties involved, 306 f.; human nature irrational, self-deceiving, 306 ff.; mechanism of projection, 310 f.; its rôle in maintaining national hatreds and war-readiness, 311 ff.; objectivity, as test of lack of projection, 317.
Pavlov, I. P., obituary, 344-348.
Personality, general principles concerning, 1; objective study of, 1 ff.
Personality, investigation in collective, 52-60.
Personality measurement, in terms of single persons, 294-304; standard persons, 298 ff.
Personality structure, comparison of American and German, 283 ff.; dependence on the social situation, 291.
Perseveration and character, 44-52: definition of perseveration, 45; tests of, 48 f.; relation to determining tendency, 50 ff.; relation to fluency, 40 f.
Predilections for color, experiments on, 19-25.
Psychic tempo, measurements of types of, 301 ff.
Psycho-analytic treatment problem of cultural origins, 85 ff.
Psycho-diagnosis, 3.
Psycho-diagnostic society, newly formed, 81.
Psychology, Departments of, at Harvard University, 82; at Yale University, 254 ff.
Psychometry, contributions to theory of, 294-304: measurements, comparison with physical, 294 f.

Race and modes of expression, 53-60.
Rorschach test and racial psychology, 97-115: description of Moroccans, 97 ff.; principles of interpretation, 100 ff.; psychological analysis of Moroccans, 106 ff.; relation to art products, 109.

Schizophrenia, genesis of, 185-194: case history, 186 f.; similarity of manifestations to those of normal, 187 ff.; relation to schizoid type, 188 ff.; dependence on environmental situation, 193 f.
Social characteristics of the American as contrasted with the German: relative equality of child and adult, 269; avoidance of interference, 270; lack of submissiveness, 271; emphasis on independence, 271; contrasting extremes, 275; punctuality, 275; respect for other individuals, 276; interests in individual accomplishments, 277; relatively small social distance between individuals, 280 f.; less need of privacy, 281; less inclined to anger, 285; emphasis on action, 286; personality more influenced by present situation, 291.
Social distance between individuals smaller in America than in Germany, 280; operational definition of, 282.
Social institutions, psychoanalytic treatment of origins of, 85 ff.
Social situation (*see* sociological situation).
Sociological situation, influence on psychology, 267; characteristics of: a concrete dynamic whole, 278 f.; space of free movement, 268 ff.; differences in social distance, 280 ff.; degrees of freedom and sharpness of boundaries, 272 f.; homogeneity in, 272 f., 278, 287 f.; topological derivation of these characteristics from differences in social distance, 280 ff.
Sociology. comparison with psychology, 266.
Speed tests, 40 ff.
Statistical techniques in personality measurement, illustration of, applied to taste for color, 19 ff.; new technique for measuring personality types, 335 ff.; new technique of correlating persons instead of tests, 17 ff.; objections to, 15; relation to psychological analysis, 16, 340 f.; value of, 16.
Stereotypes, 45.

Taste (or predilection), experiments on, 19-25.
Temper, analysis of the Balinese, 120-146: bearing and pace, 121 ff.; decorum, etiquette, posture, 132 ff.; deviants, 139 f.; emotional life, 136 ff.; orientation, spatial, 125 ff.; social, 128; physical exertion and well being, 123 ff.
Temperament, 46; Heath Clark lectures on, 82 f.
Topological derivation of differences in sociological situations from the concept of social distance, 282 ff.
Topology, advantages of, 265; definition of, 279.
Traditions, force of among the Balinese, 141 ff.
Traits, classifications or functional unities, 12 f.; difficulties in measurement of, 2; relation to factors and faculties, 225 ff.; relation to psychometry and type analysis, 296; unitary mental, 335-343.
Twin similarities in emotional traits, 61-78: traits studied, 64 f.; effects of age, sex, intelligence, 67 f.; comparison of twins with non-twins, 68; item analysis, 72; nature vs. nurture as cause, 73 f.
Types, definition of, 296; measurement of psychological, in terms of inverted factor theorems, 298 ff.; psychology of in relation to psychometry, 295 ff.

Unitary mental traits, recent research on, 335-343: committee on mathematical methods, 337 f.; experimental studies, 339 f.; factor analysis studies at Thorp and Mooseheart, 342 f.; historical development, 335 ff.; psychotic and prepsychotic character, 339 f.; suggestions from physiology and comparative psychology, 338 f.; survey, 342.
United States, comparison of educational system with that of Germany, 265-283.

Voice, compared with other expressions of personality, experiment on, 9 f.

Wants, and connectionism, 247 ff.
War and pacifism, analysis of psychological attitudes toward, 305-318.
